Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Frenzied Bidding for NGC Material Next Auction Blitz Nears

The Whitman Coin Show in Atlanta is underway. So too is the Eldorado Sale that is being conducted by the Expo's host auctioneer, Stack's. Following the Atlanta junket, many dealers will head to the Long Beach Show, May 28-30. A host of auctions will surround this event, including a sale by Goldberg Coins and Collectibles, May 24-25 in Beverly Hills, a sale by Tangible Investments May 26 in Newport Beach, and of course a sale by Heritage in Long Beach (see Heritage preview herein). Ironically, with all these sales, either ongoing or just a week or two away, the sight-unseen market is in a backward looking mode, still digesting the $38 million realized at the CSNS Heritage sale. Bidding and trading activity has increased dramatically, in the last week or so, on the sight-unseen front. Last week's ***Bluesheet*** headline—"NGC Silver Type Explodes"—meant to convey the unprecedented Bidding activity in quite some time—actually pales by comparison with this week's frenzy of Bidding. Heritage has upped the ante, extending its Bidding dragnet to an ever-larger number of NGC Gold, Silver and Nickel Type coins

Let's get to the specifics. The Morgan Dollar columns are filled with both plus and minus signs. In fact, there are 74 Bid increases on the NGC side and 71 on the PCGS side. The increases are rather modest, and only a handful involves coins over $2,000. Conversely, the decreases in Bid involve some rather high dollar coins. Of particular note, an 1895 Morgan Dollar graded NGC PR67 realized $69,000 at retail auction, resulting in a current wholesale Bid of $62,500. A trio of "S" Mint DPL coins sold at public auction for significantly less than the former sight-unseen Bid, and all three now reflect a lower wholesale Bid level. The three issues are the 1879S (Rev. 78), the 1885S, and the 1891S. The sight-unseen market for Silver Commems continues its freefall. The damage is pretty equally spread across the PCGS and NGC columns. Jumping off a cliff without a parachute, a PCGS MS67 Stone Mountain Memorial plummeted some $240. Following closely behind, a 1934 Maryland Tercentenary in an NGC MS67 holder went off at public auction for $633, 30% below last week's Bid. Flip to Page 4—Mint State Type—and this is where things get really cool. Do not let cynicism or analysis lead us astray. Last week, Bid for a Flowing Hair Half Dollar in an NGC MS61 holder was $12,500. This week, it is $25,000. Last week, Bid for a Flowing Hair Dollar in an NGC MS62 holder was $30,800. This week, it is $60,000. At the other extreme, Bid has increased for Liberty Nickels, with Cents, in NGC MS63 from $60 to $100. Have a pile of 25 coins? Last week, those 25 coins were worth $1,500 sight-unseen. Today they are worth $2,500, and since this is sight-unseen, it doesn't matter if the coins are dark, overgraded, turned in their holders, or are just plain ugly. If the next thought is, "Well, Bid has increased, but it's still way less than PCGS Bid." That is not true as PCGS Bid is $70. Flopping back to the more expensive items, that $60,000 Bid, sight-unseen, for a Flowing Hair Dollar in MS62 overwhelms the $33,600 offer for a similarly graded PCGS coin where 20% fewer have been graded.

There is similar drama on the Proof Type page. Leading the charge are Silver "minors". Liberty Seated Dimes graded PR63 by NGC were Bid $284 last week. This week Bid is $465. For a little perspective, this particular issue, a Liberty Seated Dime with Legend, was Bid $245 and $240, for a PCGS and NGC coin respectively, in October 1997. Both PCGS and NGC had not shown much in the way of price movement until May 2008, when the PCGS coin "jumped" in Bid from $280 to $475. Today, the PCGS coin stands with a $500 sight-unseen Bid. The NGC coin remained at $284 from May 2008 until now, and its Bid has jumped this week to $465. To sum up Proof Type, there are 49 increased Bids on the NGC side, and 9 increases on the PCGS side. This week's ***Bluesheet*** includes Supplemental Page F: Standing Liberty Quarters, Franklin Half Dollars and $20 Saints. The Saints are particularly influenced by Heritage's voracious appetite for NGC graded material. So much so that it will now trade at a significant premium to similarly graded PCGS material-an unusual situation to be sure.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity, including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid, by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Trifecta Of Higher Bids For NGC Type
Long Beach Expo Welcomes Dealers

The Eldorado Sale, conducted by the Atlanta Expo's host auctioneer, Stack's, realized $2 million, much of that total coming from sales of currency, exonumia, and uncertified rare coins. Going forward, all eyes are fixed on the Long Beach Expo, May 28-30, as a host of auctions, loaded with coins certified by PCGS and NGC, surround this event. This year's expo will be quite active, with multiple club meetings, seminars and displays. Scott Travers and Jim Kingsland will hold their much-anticipated educational forum, Saturday, May 30. Entitled, "Gold: Hoping For The Best, Preparing For The Worst," such a seminar is certainly well-timed, as Gold has been on quite a tear lately. Just two weeks ago, Spot was barely above $900 an ounce; now at $950, it is clear that interest in Gold is rising rapidly.

Bidding and trading activity is robust on the sight-unseen front. For a third week in a row, we have noted increased Bids on numerous NGC Gold, Silver and Copper Type coins. Trading activity on the CCE network is up about 10 percent this year from 5/1 to 5/21, as compared to this same period last year. The number of individual coins that have traded has nearly doubled, for the same time period comparison. The average value of each trade, however, is down dramatically from $2,830 to $1,825. Perhaps dealers are starting to let go of some of the less expensive material at the lower levels but remain cautious on doing the same with the higher valued material.

The Morgan Dollar columns are filled with mostly minus signs this week as discounted sales persist, with no Bidders present at current levels on either side to support this bellwether series. Peace Dollars are following the same pattern this week. One might express consternation at the number of coins sold below last week's **Bluesheet** levels. Nevertheless, these trades reflect a market that is recognizing the reality of the present value of one's inventory. For dealers, the next deal certainly holds more potential for profit than does hoping and wishing that the value of inventory will magically recover to the levels that existed during the summer and early fall of 2008. For all that, it is perplexing that a 1934D in an NGC MS62 holder went off at retail auction for only $109 against a standing sight-unseen Bid of $180. We always scratch our heads when money is left on the table like this, as the sight-unseen trading venue is the quickest, easiest and most efficient method of selling coins. And with sight-unseen trading, it's a done deal—no dickering, no reneging, and no returns.

Silver Commems continue to suffer with five times as many coins dropping than advancing. Casualties exist in all grades, from MS61-MS67, primarily due to low prices realized at recent retail auctions. Verification can be seen throughout the Market columns. In addition to auction results causing declines, significantly lower dealer Asking prices have also contributed to the mayhem. On the bright side, Hawaiian Sesquicentennials are enjoying a Bid jump across-the-board in NGC MS63-MS66. Both NGC and PCGS are Bid $2,550 in MS63, while NGC Bid now exceeds PCGS in the MS64 and MS65 grades. The PCGS Bid of $7,000 in MS66 is still significantly higher than the new posted Bid of $6,000 for NGC slabs. PCGS has graded over two thousand as MS63 through MS66 of the nearly ten thousand originally minted. NGC has encapsulated over fourteen hundred in this same grade range. Mint State Type continues as the big story within the sight-unseen market. The PCGS chart is eerily quiet with respect to changes in Bid level. Within PCGS Gold Type, there are several minus signs present, especially for generic Double Eagles. This is in sharp contrast to the NGC Twenties, where healthy advances are prominent.

The Market column, published on the fourth week of each month, always exhibits a wealth of information, and this week is no different. Public auction results from the past four weeks are preceded by the letter "a" while those auction prices from the previous month are denoted by "oa". This information within the Market column can be used to learn about the state of a specific area of the market. For example, within the PCGS MS67 column for Silver Type, an 1837 No Stars Half Dime sold at auction for $15,525 against a *CCDn* Bid of $9,500. A Capped Bust Half Dollar sold for $35,940 against a sight-unseen Bid of $30,000. A Barber Quarter with a PCGS MS67 Bid of $4,000 sold for $4,315 (this being the lowest amount realized in the last month among the six or more coins sold). Generally, on the PCGS side, coins offered for sale are realizing in excess of the **Bluesheet** Bid levels whether or not there currently is an actual visible Bidder present. On the NGC side of the Type chart, at least one dealer has concentrated their Bids on Early Copper and a couple of esoteric Silver Type issues, namely the Draped Bust Quarter, Heraldic Eagle Reverse and the Capped Bust Quarter Dollar, Large Size. These new, higher sight-unseen Bids are now more aligned with the realizations for such material at auction. For example, the sight-unseen Bid of $6,000 for a Capped Bust Half Dime in NGC MS67 is in line, given that an example sold at auction in the last month for $7,475. Additionally, the present Bid of $10,000 now in place for a Capped Bust Quarter, Small Size, better corresponds with an example which sold for $11,500 in recent weeks. Such increases within the sight-unseen marketplace are an encouraging sign with many hoping to see more of the same.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks [illegible] and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Introducing the new **SCRATCH RESISTANT** *EdgeView® Holder*

Newly available for use in NGC coin holders, the scratch resistant polymer coating has been successfully incorporated in fine eyewear for years.

The same material that protects the delicate surfaces of eyeglass lenses while maintaining their transparency is layered onto NGC's new Scratch-Resistant EdgeView® coin holder. Using this advanced optical-grade UV-cured hardcoat, we've combined our holder's proven capabilities for long-term storage with exceptional durability – all without sacrificing crystal-clear presentation. Hobby-leading innovation is just one more way NGC demonstrates our rare commitment to numismatics.

Visit www.NGCcoin.com/holder for more information and to learn how to submit your coins for encapsulation in the *Scratch-Resistant EdgeView® holder*.

Long Beach: A Collector's Expo
Higher Bids Target PCGS Silver Type

Dealers and collectors having enjoyed a brief holiday have arrived en masse to So Cal for the Long Beach Expo. With the pre-show sale held by the Goldberg's, numismatic neophytes and veterans alike are trolling the expansive bourse looking for fresh deals and getting a feel for the pulse of the present market. While set-up day may have been lacking the fervor and buzz of the snorting bull, those we conversed with on the floor were expecting a productive show. A well-known east coast buyer confided he hasn't, nor is expecting to sell a trove of high ticket slabs, yet is confident that coveted keys and dazzling Type under $10k will make his show. Another staple entity at the expo advised they haven't experienced any letup in volume. In fact, they were inundated with sales (from several hundred to mid five-figure range) from their most recent collector mailing. While this was not the prevailing sentiment, several larger firms were also bracing for a rush—a gold rush from the public. With the yellow metal arrowing up to over $960, the consensus is that many on the sidelines will now be making a concerted move. We were also told on numerous occasions that mainstream collectors, the true hobbyists, are still very active. Confirming this, many of the Long Beach brethren still have considerable want lists in tow, and if they can locate the coins, will also be flying home happy. Right now, early Mint State Type in mid grade is a hot ticket. One market maker said this is truly going to be a *Collector's* Expo. This can be readily confirmed by the marked increase for PCGS product in this very issue targeting much of that collector friendly, slabbed material. Another positive barometer is that the host auction by Heritage was already guaranteed nearly a 90% sell-through on all featured lots courtesy of many aggressive early bird Bidders.

Perhaps a harbinger of things to come, the sight-unseen market is also quite active, especially during a major show week. The overall trend is quite impressive. Since the end of December 2008, active Bidders on the electronic trading workhorse CCE has increased by nearly 50%. The big surprise is the surge for $5 Liberties. This American favorite finds that only 6 issues had active buyers with Bids posted totaling $7,010 at the end of 2008. Today, over 5,000 listings are reported with viable Bids amassing $11.5 million. $1 Gold Type and $2½ Libs also trumpet a similar dynamic scenario. Classic Silver Commems reveal many more higher end slabs sliding back. The bottom hasn't been found in the Classic Gold corner either as several more drift south. With Silver Spot roaring back over $15, we note only a trickle of elevation targeting lower echelon inaugural year 1878S Morgans. We note a minor rift ongoing with PCGS MS62 Type settling at $29 while NGC product maintains their status quo at the $30 level. Peace Dollars deliver only a few minor castoffs. Yet with so much activity, a few bargains slipped past the radar. Most notable a 1926S NGC MS64 was taken home for $92 during an internet affair while a standing blind offer of $175 watched. Similarly, another 1926, this a Denver delivery, also NGC MS64 realized $173 as a $225 buyer went unnoticed.

Mint State Type finds PCGS material making a statement as an east coast buyer is Bidding higher, sometimes substantially, on mid-grade Draped, Capped Bust and Liberty Seated denominations. Leading the impressive salvo on a dollar basis is the $2,250 advance chasing MS61 Draped Bust Quarters with Heraldic Eagle to $6,750. NGC's major casualty on this front is an 1814 Capped Bust Dime reeling back by nearly $10K in the MS67 Type Bidding column. This otherwise impressive coin faltered at the Goldberg sale. We spot an 11% boost following MS65 NGC Draped Bust Heraldic Eagle Dollars raising the ante to $100K. Gold Type remains a force for buyers to reckon with as double digit advances fan the flames higher by as much as 30%.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks/Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Battle In Baltimore Begins
Spot Drives Gold Type Bandwagon

Regardless of the season, there always seems to be a coin show or auction on the immediate horizon. Most concur, especially now, these junkets are mandatory to accurately gauge market trends and to ascertain the overall health of the numismatic arena. Now on the heels of a highly successful Long Beach adventure, most in the business have already booked passage, and will soon be in route to the hospitable eastern shores for the Whitman Baltimore Coin & Currency Expo, running June 11-14. A watchful eye will be cast on the thousands of offerings hitting the auction block June 11-12 courtesy of the host sale conducted by Bowers & Merena. Prices realized will be carefully scrutinized. Over the past several months, there has been a positive shift in this regard. If the last two Heritage auctions at Long Beach are an accurate barometer, there may very well be more heated action targeting five- and six-figure slabs this summer season. A careful study of the past two feature sales offers this telling tidbit: Both the February and May 2009 outings realized nearly equal amounts, reporting in at around $13 million each, yet the latter accomplished this with nearly 1,300 fewer lots. The just concluded So Cal sale also boasted a 70% increase in lots realizing over $40K and heralded three times the amount for six-figure sales, including the $1.437 million hammer to the vaunted 1856O Double Eagle. Even in the present climate, the impressive price of this coin can't be overlooked, having realized over 250% since its last public appearance exactly five years ago at the same Long Beach venue. Certainly any investor or advanced collector would be thrilled to see that type of return on *any* investment in 2009. Additional certified conditional rarities have made some noise, too. Consider the 1869 Indian Head Cent, a PCGS MS66RD, which saw a 25% advance from when it last appeared ($40,250 versus $32,200). Also, the popular 1909VDB Lincoln Cent, residing in a PCGS PR64RB slab, took home nearly three times what a coin of the same grade realized two and one half years ago ($40,250 versus $14,950).

Of course, not all auction fare has generated a gain for the consignor as in the case of the 1869 Indian Head Cent. What is pertinent here is an obvious increase in the sell-through rate of higher priced slabs. Confidence in the present market is strong enough that heady and more calculating buyers are still anxious to open up the coffers at these levels. It's definitely not a case of collectors needing to sell this stuff before the bottom falls out. With that said, some expect to see more aggressive action in Baltimore as buyers battle and look to corral eye-appealing mid-priced PQ and CAC keys of virtually any series that comes their way on the floor.

The sight-unseen market, as one might expect after a major show and multiple surrounding auctions, has left some cleanup. Classic Silver Commems once again feature many heading south, led by a rainbow toned NGC MS67 1893 Columbian watching Bid cast adrift by 30%. Interestingly, an NGC MS65 Lafayette Dollar sold for $5,750 at the Heritage sale while the host's blind Bid of $6,000 went unnoticed. Classic Gold had a little better go of it, although several tumbled. Morgan Dollars reveal a multitude of minor rifts with only the 1893CC PCGS MS64 slab dropping by 20%. On the flip side, a trio of better issues is higher with the popular 1903O delivering modest advances in MS62-MS64. While minor gains are noted for sundry ANACS and ICG slabs, ICG was hit hardest with three better dates rolling back over 20%, led by a pair of Cajun issues: 1888O and 1881O. Mint State Type is a bit of an enigma. While large Capped Bust Quarters find NGC MS64 specimens riding a 10% advance to $5,750, NGC MS67 Type got clobbered after an 1815 Capped Bust Quarter realized $27,600 at the Heritage auction. This couldn't have been good news for the consignor as the same coin sold for $48,875 at the FUN sale in January. Proof Type finds a major market maker bolstering NGC slabs as high grade better Barber Quarters, Halves and Morgan Dollars are each getting a boost. With Gold Spot making a determined move, virtually all issues are serving up advances. NGC Saints in MS61 and MS62 are now Bid higher than the *next highest grade* for those slabbed by PCGS.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Old Line State Holds The Line
Gold Type On Fire

Early reports from the east coast confirm that the collector-rich base of enthusiastic numismatic brethren has made its appearance in Baltimore for the Coin and Collectibles Expo. While continued rain and gloom dampened the spirits outside, inside the spacious convention hall found the bourse action to be quite heated and lively. During set-up, the buzz was audible. We heard from several dealers that demand for nice mid-priced, certified coins has kept them in the black, and they expect that same trend to hold the line in Baltimore. On the other hand, some regular attendees mused that things have slowed for them, feeling that the bottom for generics hasn't been hit yet. Others shrugged off that sentiment and were intent on having a profitable show.

Without a doubt, legions of true hobbyists would love to have the luxury of keeping up with the big boys on this never-ending show and auction circuit. Thanks to technology, now they can. Bidding and viewing lots at their convenience on a laptop or i-Phone is now a part of the accepted numismatic purchasing process. In fact, Baltimore's auction host, Bowers & Merena, has taken a step toward this growing and appreciative audience of home-schooled numismatists. In addition to their feature sale, B&M has included a premiere on-line only sale, closing on June 12th, comprised of over 650 lots of certified offerings to whet the appetite of those not able to make the trek to the Old Line State. Heritage is also stepping up its on-line exposure, incorporating an inaugural Thursday sale to augment their Sunday and Tuesday fare. To entice more business, several other auction companies have lowered their buyer's and seller's premiums, and in some cases, such as the Gold only internet sales, have waived the buyer's fee entirely. As we go to press, one of the keys to the feature sale, the 1876CC Twenty Cent piece residing in a PCGS AU58 slab, had already garnered an early Bid of $155,250. This storied rarity is perhaps the only known example of this rare date that has seen a modicum of circulation. With this in mind, the finest known of the CC rarity, a PCGS MS66 specimen, was sold earlier this month for $460K at Central States. A fabulous bit of early Americana in the form of the 1652 New England Pine Tree Shilling grading NGC MS65 is also creating a frenzy. Pedigreed to John J. Ford, this is carrying an aggressive early Bid of $65,550. This is already more than 50% higher than the same coin commanded ($43,125) at the height of the Ford mania at a Stack's session in late 2005. This special coin along with the famed 1876CC, confirm that classic rarities in high grade, with a story and pedigree, sell well in any market, while generic and *pseudo rarities* continue to slide.

With that in mind, the sight-unseen market hasn't fared all that badly. It is nearly the same as last year, when the *CCDN Coin Market Index* reported in at 927.52 versus 926.35 today. Mint State Type has certainly done its part, with significant advances across the board. Although Gold Spot is presently trading nearly $100 higher (or 11%) than a year ago, many within the Gold Type segment are performing even better. NGC MS61 $5 Liberty with Motto are up 72% from last year as can be seen in the chart of the top ten leaders herein. Leading the run this week are PCGS MS64 $10 Libs as they advance to close the gap with NGC slabs along with $5 Libs and $10 Indians in the same columns. Several NGC sight-unseen Bids continue to be substantially higher than their PCGS counterparts. Overall, the electronic dealer trading networks are reporting in with considerable activity on the heels of a major show and sale.

While Classic Silver Commems' bad habits die hard, only a handful are coming up short, led on a percentage basis by the Iowa with PCGS MS66 examples dropping to $85. Classic Gold reveals that the Sesquicentennial Quarter Eagle has active sight-unseen buyers at the elevated $950 level for PCGS MS64 specimens. Morgans remain steady overall this week with only the 1888S in MS66 worth writing home about; the NGC Bid slid to $5,850. Gold is sizzling this early summer; take a look as a host of players are on the move. Early Gold Type is also on fire as low to mid grade NGC $10 Draped Bust Heraldic Eagle claim $17,500 for NGC MS60 examples followed by little brother $5 Draped Bust Heraldic Eagle rolling to $8,250 in like grade.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflikes. Bids for P/L's are usually much lower than for DMPL's but command some premium over non-P/L strikes.

Introducing the new **SCRATCH RESISTANT** EdgeView® Holder

Newly available for use in NGC® coin holders, the scratch-resistant polymer coating has been successfully incorporated in fine eyewear for years.

The same material that protects the delicate surfaces of eyeglass lenses while maintaining their transparency is layered onto NGC's new Scratch-Resistant EdgeView® coin holder. Using this advanced optical-grade UV-cured hardcoat, we've combined our holder's proven capabilities for long-term storage with exceptional durability – all without sacrificing crystal-clear presentation. Hobby-leading innovation is just one more way NGC demonstrates our rare commitment to numismatics.

Visit www.NGCcoin.com/holder for more information and to learn how to submit your coins for encapsulation in the *Scratch-Resistant EdgeView® holder.*

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXIV No. 25 June 19, 2009 Single copy price $4.00

New Five-Figure Sight-Unseen Bid Jumps Bowers & Merena Hammer Over $4 Million

Summer is fast upon us, and as the dealer and collector network breaks camp on the east coast, many of the same flock's eyes are trained on yet another journey. Their next destination: The MidAmerica Coin Expo June 25-28 held in the greater windy city's neighbor of Schaumberg, Illinois. Location is always an important factor, and considering that much of America's numismatic heartland is within driving distance, logistically this makes for a convenient road trip for collectors as well as a getaway for their families. With an eclectic feature auction by Stack's anchoring the festivities on June 25, there is certain to be something within reach of most attendees' budgets. The recent Baltimore sale by Bowers & Merena cleared over $4 million, with a six-figure highlight being the heralded PCGS AU58 1876CC Twenty Cent piece, claiming $207,000. Four lots realized over $50K, and that quartet was all Gold, including a pair of Pan-Pac $50, both grading MS64.

Although the market has softened and is still Jell-O-like for generics, those adorned with the little green bean are a welcome sight, especially since, in many instances, there is a negligible premium for these slabs. Many dealers and pundits on the circuit concur that some bargains are to be found at today's levels. Like Morgan Dollars, a wealth of CAC stickered Classic Silver Commems, some with glorious original color, can be scooped up without paying much of a premium, if any. This is a great coup for the established collector or the new hobbyist, that is, being able to purchase a problem-free, slabbed coin which is at the very least, solid for the grade. Still, as other markets suffer, rare and top tier certified coins remain an exceptional store of value.

Silver Commems are mixed this week, yet on the positive side, eight different issues in NGC MS67 show advancing Bids. The popular Lafayette Dollar in NGC MS65 is now even higher to $6,150. Overall, there are 27 issues declining moderately, ranging in value from $75 to roughly $650. Gold Commems are equally mixed, with all but one advance targeting the Lewis & Clark and Pan-Pac Dollars in MS63-MS66.

Morgan Dollars continue to see widespread softening, primarily from lower prices realized at public retail auctions. Those that lost ground this week are mostly in the collector-friendly price range of $1,000 or less. The usually quiet Peace Dollars are joining the topsy-turvy action with a mixed bag of plusses and minuses. Nickel Proof Type is experiencing modest downward adjustments for Liberty, Shield with Rays, and Three Cent piece designs. Mint State Silver Type tells a different story with a number of issues higher this report, especially NGC examples. Large Size Capped Bust Quarters, Barber and Seated Half Dollars with Motto are all up through grades MS67. Many of these higher sight-unseen Bids are in the unusually high five-figure range. A stunning 20 percent increase to Bid, now at $30,000, has been recorded for any Large Size Capped Bust Quarters in NGC MS67. An example of this Type coin, an 1815, recently sold at a Heritage retail auction for $27,600, a far cry from the $48,875 this same coin realized in the same venue in January. These coins now have higher sight-unseen Bids in MS64, MS65 and MS66, as well. The largest Bid increase this week within this area on a percentage basis goes to Liberty Seated Quarters with Motto in PCGS MS67. Bid has rocketed from $3,500 to $4,500.

Mint State Gold Type is insanely busy this week as dealers show a great deal of optimism for some high ticket items. Of particular note is the five-figure increases to sight-unseen Bid, as PCGS MS65 $10 Libs without Motto jump from $55,000 to $70,000. We would be remiss if we did not point out that this issue is presently a pop 2 coin. Select NGC Gold Type continues its recent pattern of Bid increases, many of which are higher than PCGS examples, especially generic Double Eagles. Take a glance at $20 Saint-Gaudens on Supplemental Page F where this can be seen quite clearly.

Mercs, Buffaloes and Walkers are all showing signs of weakness as a variety of issues in a variety of grades and price ranges continue to sell for "right around" present sight-unseen Bids. For all that, the amount of money actually left on the table is rather small.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Sight-Unseen Bids Double For Select Type Big Generic Market Shifts

The summer season's first full week is winding down on the heated heels of a rather upbeat gathering of numismatic fraternity at the MidAmerica Expo. Steamy and hot outside, those strolling on the bourse were anxious to scoop up some cool deals. The consensus of those in attendance is that low to mid-priced slabbed coins are still being cherry picked. Several collectors on the prowl in Illinois were intent on tracking down their want list coins housed in old PCGS rattlers and NGC fatties in the under $2,000 price range. Problem-free scarcer dates and bread-and-butter keys in many series such as Indian & Lincoln Cents, Merc Dimes and Barbers were also heavy on the want side. Certified examples that met these requirements enjoyed a very brief shelf life in dealers' inventories. Several buyers were ferreting out scarcer CC material in all denominations for their customers. A group scrounging the bourse for better branch mint Gold was also looking for CAC offerings. Dealers know that finding Early Gold is one thing; the other is locating a coin with its original skin intact, not one that has seen its mint luster dipped and stripped away. This instance is where CAC "solid for the grade" is justifiably worth much more than the price of the green sticker, especially for the novice collector or non-seasoned dealer. One example of the CAC premium is seen in an 1876CC $20 Lib, graded PCGS AU58, which sold for $3,881 on March 28 at the Heritage Baltimore sale. This exact coin just returned to market at a David Lawrence internet-only sale on 6/19, this time bearing the green CAC sticker, and realized $4,485. This represents more than a 15% advance in less than three months.

Silver Commems flash some bright spots, particularly for NGC graded material. Of special note is the $1,800 Bid for any Washington/Carver in an NGC MS67 holder. This sight-unseen Bid is now 80 percent higher. Also, the very desirable Hawaiian Sesquicentennial has a buyer that will take any NGC MS67 example for $17,000, which is $2,000 more than Bid for the *sole* PCGS specimen. Morgan Dollars post some modest gains for a few issues in select grades. Minus signs are only slightly more pervasive in number, and the actual dollar amounts, while somewhat greater than those associated with the plus signs, are not alarming. For those desirous of a much more detailed breakdown on what is going on with Morgan Dollars, let us point out that the CCDn Market column boasts an extraordinary number of results pertaining to this series. Let us look, for example, at PCGS MS64 Morgans. There are more than 50 auction results, denoted by the letter *a*, 12 or more actual transactions, *t*, were reported to us, and another handful of *w*'s, indicating the lowest asking price from a reputable dealer to sell the coin at the listed price within the past week. The letter *m* indicates a lower priced example was offered within the past month.

Peace Dollars are peculiarly mixed this week. There are higher Bids for the 1922, the '26D, and the '35 in NGC holders at the lofty MS67 level, yet PCGS MS63 common dates have dropped to $24. Mint State Type is flooded once again with plus signs for nearly all denominations and metals. Sight-Unseen Bids for Early Copper, has in some cases, doubled. For example Liberty Cap Large Cents advance from $5,000 to $10,000 for an NGC MS63BN slab. In MS65BN condition, Bid is now $30,000 whereas it was $15,000 previously. Finally, an MS64BN specimen jumped to $15,000 from $8,000. Mint State Gold Type boasts numerous higher Bids. We could focus on the five-digit advances on some esoteric Type, but it is perhaps more revealing to note that the spread between the services continues to widen. This is especially noticeable with MS63 generic Saints, now Bid some $235 higher than those encapsulated by PCGS.

While early summer is sizzling, the electronic trading networks are a hotbed of activity. In fact, CCE's Big Generic Market broke the $24 million mark in total trades this month. Not a surprise, Double Eagles are responsible for nearly 90% of the venue's transactions, yet Silver Dollars have led the Double Eagles in sales volume in 4 of the last 7 weeks. If we backtrack the entire 89 weeks since the Big Generic Market's inception in November 2007, this situation occurred four times. With MidAmerica in the books, now may be an opportune time for dealers and collectors to log in a vacation. In less than two weeks, Summer Fun in West Palm Beach beckons, and a fortnight later will find many of the same roving band stomping around the heartland for the 49th Annual Coin Festival, July 23-25. Scotsman's Midwest Summer Sale will be held July 24 in St. Charles, MO.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Summer FUN Around The Corner
Gold Type Still Sizzling

On the heels of a rather productive show in Schaumberg, Illinois, some dealers and collectors are partaking in a brief patriotic summer holiday, while others have already booked passage for the next big show on the circuit. The West Palm Beach Summer FUN show and Heritage auction is next on the always hectic numismatic docket. Whereas the Winter FUN show is often referred to as the key early barometer for the numismatic calendar, this summer version could be equally important. The consensus is that although floor traffic wasn't as heavy as expected, business was being conducted at a fairly good clip at MidAmerica. Several attendees confirmed that sales of collector friendly material—key dates, early Copper and just about all Bust Type Silver—was a runaway hit in America's breadbasket.

As markets for certified coins appear to have stabilized courtesy of some aggressive sight-unseen Bids of late, the trend for the second half of 2009 appears to be cautiously upbeat. In addition to the warm reception for this material, one electronic dealer trading network, CCE, is reporting a substantial increase in Bidding muscle. During the last month of trading, the number of listings and Bids for Flying Eagle Cents is up 32%. Seated Liberty Halves are also highly motivated. This may come as a surprise to some pundits, yet active Bids have advanced by 18% since the end of May for this somewhat forgotten assembly. Modern material also has its suitors. Twentieth century collectors are being heard from as dealers look to satisfy some baby boomers. Surprisingly, Proof Jefferson Nickels and Washington Quarters are each elevated by as much as 20%. Dealers that have been able to go with the flow should find themselves in an enviable cash position, allowing them to be competitive for any fresh deals that come their way in the Sunshine State, July 9-11. Just two weeks later, the road show motors west to America's heartland for the Missouri Numismatic Society convention, July 23-25, anchored by the Scotsman Midwest Summer Sale, July 24. Key dates, a wonderful array of collector friendly material, and a wealth of captivating original toned slabs highlight this auction; we list several of the many feature lots within.

Silver Commems are exceptionally quiet this week, although Gold Commems do exhibit some minus signs. Morgan Dollars continue to undergo downward adjustments to Bid. The issues involved this week are mostly better date coins in MS62 through MS64, like the 1898S in an NGC MS64 holder which fell from $530 to $475. Bid for NGC MS66 1921 Peace Dollars slipped from $3,060 to $3,000. ANACS and ICG Bids for Dollars follow the trend that PCGS and NGC coins have shared—which is downward. Mint State Gold—and we can not stress this enough—continues to shine with numerous plus signs gracing PCGS, NGC, ANACS and ICG specimens. $5 Indians lead the charge as Bid rises to $475 from $430 for MS61 examples in PCGS holders.

The consumer watchdog organization Numismatic Consumer Alliance, Inc. (NCA) reported the recovery of $884,769 in full refunds from sixteen recent disputes. Most of the disputes involved telemarketers selling grossly overpriced bullion coins and modern issues to elderly, unsuspecting buyers. NCA is a New Jersey based not-for-profit organization which became operational in 2005, and has recovered more than $4 million since its inception. In one case, a senior citizen from Arizona purchased over $100,000 in coins slabbed and graded by National Numismatic Certification, LLC (NNC) and the Numismatic Trust Corp. (NTC). The material from both services was consistently overgraded according to NCA. Plans are in the works to increase the scrutiny of such grading services. NCA has also announced its intentions to develop new educational programs intended to alert the public to potential dangers when buying coins. NCA's website provides more information on the subject of consumer protection, and can be found at www.stopcoinfraud.org.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

Florida FUN For Collectors
Morgans, Better Dates Heat Up

Sweltering summer heat and thunderstorms greeted attendees outside the Palm Beach County Convention Center. Cooler, calmer conditions prevailed on the inside of the spacious hall as the third installment of the Summer FUN show got underway July 9. Opening day saw a fair share of anxious collectors with want lists scouring the active bourse. The buzz was audible as dealers braced for action, hastily getting out their inventories for the public and wholesale trading. Word from the floor verified that this is a strong collectors' market, and a very selective one. Early Type in all metals was a big hit. Nothing really new there; however, a well-known market maker saw an increase in Silver Dollar action. Collectors seemed quite anxious to cherry pick his Morgan stock, targeting scarcer dates with flash and better than average strike in the $500 plus category. Dealers were busy putting quality, mid-price slabs into new hands. While most of these transactions were in the $5K and under neighborhood, all the business adds up, keeping dealers that have revamped inventories in the black.

Gold, although trading at $916 on opening day, did little to put a damper on those intent on putting away a few lustrous Eagles and Double Eagles. Others away from the bourse were busy viewing and targeting favored lots at the Heritage sale. Of the nearly 4,900 lots to go to the block in the FUN sale by Heritage, 291 are CAC approved. A pair of particularly high-end lots are featured in this auction, both of which are CAC designated. In the case of the 1886O PCGS MS65 Morgan Dollar and PCGS PR64 1879 Flowing Hair Stella, both should realize well into 6 figures. Perhaps now, more than when the little green bean was introduced some 20 months ago, buyers on both sides of the aisle appreciate the assurance and inherent value associated with slabs adorned with the green or gold sticker. In our last issue, we mentioned that activity within the Liberty Seated Half series had been escalating. This is confirmed with the sale of an originally toned PCGS MS63 1844 entry. This particular slab sold at Heritage's Baltimore sale March 28 for $1,610. The same exact coin just reappeared at Stack's Schaumburg sale June 25 where it brought $2,300. This reflects over a 40% increase in the price realized in just less than 90 days. Once again select quality collector coins in this price range remain hotter than a pistol.

While economic conditions have not decreased demand for rare coins to the extent many feared it would, challenges regarding credit have certainly come into play. A number of dealers have been experiencing significant cash flow problems lately as a result of tightening credit lines. Some have been reduced by as much as 90%, and some have been cancelled all together. When this happens to a market maker, as it has, a ripple effect takes place that touches coin dealers right down to the small mom and pop shops.

Sight-Unseen trading is more active than normally encountered during a major show. Classic Silver Commems continue to ease back, as a quintet, including PCGS MS67 examples of the Spanish Trail and Ft. Vancouver, succumb to double digit losses. Classic Gold is in much better shape with only the 1917 McKinley off a smidgen in the NGC MS64 column. Morgan Dollars are delivering some positive action in Florida. More than 50 are advancing, most in the collector-friendly $200-$500 realm. Although, with so much activity, a few managed to slip under the radar. The most notable is a 1902 NGC MS66 example which realized $500 in a Teletrade auction while a $650 blind offer watched from the sidelines. On a percentage basis, the prize goes to a 1921D Morgan housed in an NGC MS64 holder taken home for $53 at a Heritage internet sale as a $100 sight-unseen Bid went unnoticed. Both Mint State and Proof Type are fairly quiet, yet the Better Date section is on fire. The key to the Indian Head Quarter Eagle series, the 1911D, has soared as NGC MS65 and MS66 slabs fly ahead by over 35%. Washington Quarters are also on the march. An east coast buyer is targeting both the 1932D & S series keys in PCGS holders. The latter finds MS66 specimens rocketing ahead by $1,500 in hopes of prying one of the current pop of 4 out of tight hands with the enticing $9,500 sight-unseen Bid. Early Gold Type is also shining as Quarter and Half Eagles of the Classic design are taking in higher offers in several Mint State columns, led by the double-digit advance landing on both in NGC MS64. At the conclusion of the Florida sojourn, most of the numismatic contingent will have less than a fortnight to sort through new purchases and define strategies as the road show heads west with a stop in the heartland. The final tune up before the big ANA World's Fair Of Money dance is in Missouri for the state's Numismatic Expo and Scotsman sale July 23-25. Things will heat up rapidly as the migration further west continues for the Pre ANA events starting off with the second installment of Stack's Treasures of the *SS New York* auction, getting underway on July 30 in Beverly Hills.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The CCDn may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels.

CAC Verified Coins - Trade with Confidence

Now everyone can be sure about the quality of a coin.

Whether you're a novice or advanced collector, you know that quality is what determines the value of a rare coin. The problem is, within any certified coin grade, not all coins are "solid" quality coins. Now there's an easy way to identify coins that are solid for the grade - just look for the CAC verification sticker.

CAC verifies previously graded coins and awards our green sticker only to those coins which meet our high standards for quality within their grade. What's more, CAC is a powerful market maker for CAC verified coins. In fact, last year alone, CAC has purchased over $50,000,000 worth of CAC verified coins.

Want confidence in the value of a coin? Look for the CAC sticker.

CERTIFIED COIN DEALER newsletter

CCDN — a weekly report on the ***Sight-Unseen*** *certified market published by the Coin Dealer Newsletter (est. 1963)*

Vol. XXIV No. 29 July 17, 2009 Single copy price $4.00

Pre-ANA: The Test Is Yet To Come
CAC Offers Free Membership To Collectors

Public auctions and increased foot traffic at major and minor venues are keeping the usual case of the summer doldrums away. The *CCDN Coin Market Index* stood at 930.23 one year ago, and today, at 929.10, it certainly reflects stability and strength in an otherwise weak financial market. Without a stimulus plan or governmental bailout, the hobby clearly continues to thrive. Dealers wanting to stay afloat have shed common dreck and over-promoted pseudo scarcities from their inventories. Currently, they are ferociously targeting true mid-priced rarities along with problem-free, original certified key examples in all denominations. The state of the market is a testament to the staying power and expansion of the collector base. The Summer FUN feature auction reeled in over $9 million. Exactly 100 lots claimed well into five figures, 29 of which captured over $25K. Two out of the trio of lots powering over $100K bore the CAC seal of approval. The upcoming 3 weeks should tell volumes about the staying power of the numismatic market. After the Midwest junket next week, as many take in the Missouri show and Scotsman sale, a big test comes just before the ANA World's Fair of Money in Tinsel Town, with the official auction by Bowers & Merena. The mammoth pre-ANA sales could put quite the strain on dealers' credit lines, some of which have either been severed or reduced substantially. First up is Stack's eclectic 2,500 plus lot offering of superb Colonials, Federal rarities, paper money and treasure all wrapped up in the *SS New York* sale hitting the block in Los Angeles July 30. The next day, Heritage will kick off their Los Angeles Signature and Platinum Night event beginning July 31.

CAC is broadening its horizons. Until now, submissions were only accepted from authorized dealers. Now, any collector who is a member in good standing with the ANA can submit up to 100 coins per year. Collectors will not be charged the $10 fee, as dealers are, for those PCGS or NGC slabs submitted that do not sticker, and will also be exempt from any fee increases through 2012. Once this process gets rolling, it will likely result in an influx of lower priced coins as well as a decrease in the percentage of coins that sticker.

Silver and Gold Commems mostly lose ground this week. The most glaring setback involves the Isabella Quarter where a darkly toned PCGS MS66 example sold for $3,450. The last time a PCGS MS66 Isabella Quarter went off for less than $4,000 was December 2005. Morgan Dollars are a mixed bag. Higher sight-unseen Bids are in place for a large cadre of S, O and P issues in grades MS62 to MS65. The issues targeted range in value from $60 to $600. At the same time, Bids have come down on a number of cartwheels including some key dates like the 1895S in a PCGS MS64 holder, which dropped to $5,450. Eight CC Dollars are down this week with the 1882CC in PCGS MS66 leading the way as it declines to $775. On the NGC side, the 1900 and 1921D have faltered in MS67. Common date NGC certified MS65 Peace Dollars advance to $102 in MS65; meanwhile, a few higher-grade Peace Dollars suffered at auction. Mercury Dimes get a little boost as MS67FB examples climb to $92 and $106 for NGC and PCGS specimens, respectively. NGC has holdered 7,175 coins as MS67FB and PCGS has encapsulated 8,249, with both tallies including the better date coins. A number of big-ticket Mercs got clipped in mid flight, including the 1925S in PCGS MS66FB and the 1918D in NGC MS65FB. A few Buffalo Nickels roamed the fields on a downward slope. The mightiest among them is the 1923S in NGC MS65. Also getting their hooves stuck in the mud are the 1916D, 1915S, 1914S and 1919S issues, all in NGC holders, while the wayward PCGS issues include the 1917D, 1928S, and 1935S.

Though there are a few minus signs for Mint State Type, the advancers that posted in the last six weeks or so are still in place. In other words, the most recent round of auctions, more than $10 million in material sold, had only a slightly negative effect on Mint State Type. On the Gold chart, there are a number of advancers on the PCGS side including Type 1 Gold Dollars in MS63 which are up over 17%. PCGS MS64 $2.50 Libs are up a cool 10% to $880. A wide range of Double Eagles, both Libs and Saints, are up including a majestic 16% increase in Bid for TIII Libs in PCGS MS63 plastic.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Wholesale Bids Higher Than Auctions Silver Dollars, Gold Type Active

By most accounts, the certified coin market is faring quite well for summer, or any season for that matter. Dealers saddled with unsightly widgets may tell a different tale. Collector/investors on the sidelines with cash have not been deterred measurably by the financial havoc, and for the most part have held fast to their carefully assembled collections. Now that much of the fallout has been absorbed in the marketplace, many hobbyists feel that significant value is out there in certified coinland.

Foot traffic and anxious buyers have increased on the bourse floor of late. As one market maker said, "Collectors never went away; supplies of truly scarce coins in top grade did." Mid-priced keys in virtually every series, and eye-popping Type in the under $5K category have dried up. Nevertheless, six-figure transactions continue to take place. High-priced slabs and finest registry caliber collections are still changing hands to equally strong ones. An east coast dealer announced the private sale, for $2.2 million, of the top PCGS registry set of Capped Bust and Liberty Seated Half Dimes. This 93-piece assembly, all but 3 of which are CAC stickered, included the revered and unique 1870S Half Dime, residing in a PCGS MS64 slab. This coin alone was figured in the deal at $1.4 million. Not bad considering this marquee coin sold at public auction 5 years ago when it realized $661,250 in an NGC MS63 holder.

The vast majority of Silver Commems is stable at current levels, though select issues that sold at a discount have resulted in some minus signs. In a similar situation, auction prices realized and lower wholesale Asks have resulted in eight minus signs for the Gold Commems chart. Morgan and Peace Dollars are mixed this week. Many of the higher sight-unseen Bids are for quantities—not just a single coin—in several Mint State grades. By glancing at the Market column, one can see that many coins have sold at retail auctions at or even below these levels. In fact, we count nearly 100 different date/grade combinations that realized below sight-unseen money this week alone, primarily NGC material from internet-only auctions. Mint State Type includes advances for Seated Liberty Dollars in MS63 and MS64 in PCGS slabs. The $350 advance for Choice Unc examples represents nearly a 17 percent increase. For the most part, Mint State Gold Type is up across-the-board, with the Market column particularly instructive this week. Similar to Dollars, over 100 issues, mostly NGC, realized less than their sight-unseen Bid in the past week. Examples of this are plentiful within the Market columns. We note that a TIII Gold Dollar in an NGC MS67 holder sold at auction for $2,760 even though there was a sight-unseen Bidder visibly offering $3,300, even for the worst possible example. This is an unusual case where both the seller and the highest sight-unseen Bidder are one and the same. Proof Singles continue to decline. Leading the way down is a 1941 Mercury Dime in NGC PR67 which is now Bid at $270. The carnage is pretty well distributed among Dimes, Quarters and Halves. There are a couple of Proof Nickels among the wreckage, while the Lincoln Cent Proof Singles remain unchanged. At least five more Half Dollars would have lost ground due to lower auction prices realized were it not for standing sight-unseen Bids. This is an ongoing situation that is not supposed to happen, yet continues to occur at an alarming pace.

As we go to press, the yellow metal is again trading at $955. Perhaps not coincidentally, CCE's Big Generic Market recorded the first week to eclipse 6 figures in Double Eagle trades in 3 months, the last being just before the tax deadline in mid April. The coin caravan stops in St. Louis for the MNS '49th annual coin show and Scotsman auction. After a fond adieu to America's heartland, the numismatic road show breaks camp and makes a beeline for the Golden State. All eyes will be riveted on the thousands of lots in the pair of Pre-ANA auctions by Stack's and Heritage. The ANA's World's Fair Of Money gets underway in Los Angeles August 5-9, anchored by the host auctioneer, Bowers & Merena, featuring over 5,000 lots scheduled to meet the hammer in 4 marathon sessions.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. www.cdnpublications.com

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

MARKET LISTINGS

MARKET columns reflect the latest dealer-to-dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from *wholesale* trading networks, sell lists, coin shows and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales-related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the *w*eek prior to publication (*w*eek old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade *o*lder than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

It's Showtime In Los Angeles Pre-ANA Auctions Underway

The numismatic brethren have been landing in waves in Southern California. Many arrived early in order to set up temporary digs and conduct some pre-ANA business in hotel conference rooms, restaurants, airport lounges, etc. Without a doubt, there is certainly a great deal of excitement brewing, and the atmosphere is charged in the Golden State. Any collector that can afford to, along with every notable dealer, will be in attendance. Every coin that collectors have ever dreamt of will either be for sale in showcases, or, courtesy of the superb ANA traveling museum debuting in Los Angeles, available for all attendees to see first hand. A virtual who's who of US numismatics awaits, including the historic 1787 Brasher Doubloon, hand struck by President Washington's one-time neighbor, noted silversmith Ephraim Brasher. This landmark numismatic icon, emblazoned with the prominent "EB" hallmark on the eagle's breast, is a must-see. One of two known examples of the 1849 Double Eagle and the finest known and perhaps the first 1794 Dollar to be coined will elicit oohhs and aahhs. Modern rarities will make an appearance as three of the posse of five 1913 Liberty Nickels will be show-stoppers, along with the controversial 1933 Saint-Gaudens Double Eagle, an example of which holds the record price paid for any coin. Certainly, even veteran dealers will take a break to ogle this treasure trove. Fabulous condition census certified coins and extreme rarities are also being courted in the active market. If pre-ANA action is an accurate indication, the pair of major auctions by Stack's and Heritage will be reacquainting us with significant six-figure thunder. All this excitement culminates with the fabulous Bowers & Merena sale, the official auction of the World's Fair of Money. As we go to press, multiple six-figure lots have already sold, with Stack's taking the early lead as the finest-known 1817/4 Capped Bust Half, ex-Eliasberg, housed in a PCGS AU50 slab reeled in $356,500 amidst applause on the auction floor.

Normally with a major show and a series of auctions in the mix, the electronic trading networks would be on the backburner. However, the bankruptcy filing of one major wholesaler has sent a tremor throughout the market. With the absence of a key player, the CCE's Big Generic Market has seen considerable shakeup. Total Bids and active listings on CCE alone have dropped by over 20% since the first of July. The good news is most areas haven't really missed a beat. The major exception is Mint State Gold Type, reeling back over 25% in Bid listings and value. Somewhat surprisingly, Double Eagles haven't suffered much at all. Conversely, Seated and Barber Quarters have fallen from favor, yet non Full Head Standing Liberty Quarters are charging ahead by nearly 35% in number of listings and dollar value.

The Silver Commems chart boasts no advancing Bids this week. There was some downside, with the chief amongst the declining issues being an NGC MS67 1938 Texas PDS Set, now Bid at $2,275. Gold Commems include an increased Bid for Superb Gem examples of the 1915 S Pan Pacific Expo $2½ in NGC plastic. A PCGS MS63 1905 Lewis and Clark Expo Gold Dollar realized $1,335 at retail auction. (Of course, this result includes the auction house fees.) There is a current sight-unseen Bid of $1,500 in place for this coin, which means that $165 was left on the table. Choice Unc Generic Morgan Dollars advance from $34 to $35. The high Bidder will accept large quantities at this new, higher level. Meanwhile, numerous better date coins either traded, sold at auction or were offered up wholesale at prices that result in a downward adjustment to Bid. Generic Peace Dollars in MS66 suffer as a result of lower auction prices realized.

Some esoteric NGC Type coins are targeted in Gem and better condition. Of particular note here is that the sight-unseen Bid for NGC Capped Bust MS65 Halves increases to $5,500. Proof Type follows its Mint State counterpart in that a handful have advanced in PR65-PR67. Leading the pack here is the two year Type 1873-1874 Seated Liberty Quarter with Arrows. A healthy 9 percent increase to Bid brings this popular issue to $4,500 in PR65. The three twentieth century series—Buffalo Nickels, Mercury Dimes and Walking Liberty Halves—are predominantly stable in Mint State condition at present levels. Proof Singles are all but unsupported with respect to visible sight-unseen Bids. A few early Proof Washington Quarters and 1941 Mercury Dimes are now lower in several grades.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets.
Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit, on a sight basis.

Los Angeles: Rare Coin Epicenter NGC Drops Body Bags, Offers Details Grading

The ANA World's Fair of Money is running full bore as dealers and collectors from every financial standing are making their appearance. PNG Day started off the festivities on a positive note as ample buzz and business was reported. An extremely spirited crowd of attendees was traipsing up and down the bourse with watchful eyes on everything from early Copper to Double Eagles. Many were in awe of the Smithsonian Numismatic Museum. One collector commented, "I cant believe it only cost $46,000 to buy a 1913 Liberty Nickel" referring to the check written in 1967 on display from Aubrey Bebee, the buyer of the famed McDermott specimen. This check represents the highest price paid for any coin up to that time. If we fast forward 35 years, the 1933 Saint-Gaudens Double Eagle, one of which is also on display in LA, became the presiding king of the numismatic empire when it pulled in $7,590,020 in 2002.

Several dealers we spoke to feel that market strength for true rarities hasn't dissipated that much, and many established collectors and those on the sidelines with cash, are making significant inquiry in this regard. The pair of pre-ANA auctions reeling in nearly $32 million seems to offer credence to this sentiment. Stack's *SS New York* sale reported 10 lots, each eclipsing six figures, bringing in nearly $1.8 million. Heritage, on the strength of a solid Platinum Night, brought home $24.8 million. Some thirty lots captured in excess of the vaunted six-figure plateau equaling $6.8 million or over 27% of the sale's total. As we go to press, the official ANA sale by Bowers & Merena has pulled down the curtain on an impressive first of four sessions, realizing nearly $2.2 million. This seems to corroborate the feeling on the bourse that buyers are indeed active for top-tier certified material. Although some big-ticket items have surrendered from market highs, the base seems to be building on the enormous strength of highly regarded rarities. Perhaps more importantly, sellers have finally given in to the reality of the current market. This isn't to infer that all is rosy in slabland. Coins that are just average Type or lack any real pizzazz continue to be soft, searching for the official bottom of the market.

Silver Commemoratives continue to take serious hits, particularly if they have any distractions present. Gold Commems are telling a similar story with numerous minus signs. Generic MS64 Morgan Dollars have advanced from $44 to $45, this on the heels of last week's increase for MS63 examples. Many bigger ticket Morgans sold for a discount at the recently concluded Heritage sale. Of particular note, an 1879CC DPL graded MS64 by NGC realized $23,000 or $2,300 less than the most recent previous sale of an example of that issue. An 1880O in PCGS MS65 DMPL - a population 1 coin with none finer and pedigreed to the Jack Lee Collection - realized $54,625. While we see a firming of the market on the low end, the high end still appears to be searching out a bottom. One bright spot is the new higher Bid in place for an original GSA boxed 1890CC, now at $1,900.

A wide array of 19th century Mint State Type take pretty big hits this week. Proof Type is also under pressure especially for NGC material. To wit, a Liberty Seated Dime with Arrows in an NGC PR67 holder went off for $46,000. Last time an example of this monumental Proof Type coin was sold at auction it realized $56,063. That was in August 2008. Perhaps there was a difference in quality between the two examples? Nope. It was the same coin. Proof Gold Type is experiencing the necessary downward adjustments to Bid after less than stellar performances were recorded at retail auction. A whole herd of Buffaloes are dropping as well, including the wildly famous 1937D 3-Leg Buffalo in PCGS MS66. Mercury Dimes are primarily status quo with only a few decliners. Walkers are not exempt from the weak price realizations either. Several minus signs are in place now for PCGS, NGC and ICG. Proof Singles finally get some long-needed Bid support. Specifically targeted are the Dimes and Halves from 1940 to 1942. Leading the way is the 1941 Mercury Dime in PCGS PR66 jumping from $130 to $160. To be sure, though, all is not well for "singles." The most obvious weakness is within the NGC PR67 material.

NGC has now adopted the no body bag approach. Unlike the PCGS genuine service which will not assign a grade, and similar to DGS, they will assign a "details" grade. This service will be available beginning on September 1, and will include a distinctive purple label. The grades for these coins will not be numerical, but rather VG, XF, AU, Unc, and Proof, followed by the word "details" with a description of the problem below. Details graded coins will be eligible for inclusion in the NGC registry, and will receive 50% of the points assigned to a regular, numerically graded coin.

Coin Caravan Returns West Rarities Find Homes, Junk On Skid Row

The hoopla and passion surrounding the eventful Los Angeles ANA is over. Yet less than a week removed from the World's Fair of Money, many dealers' sights are already set on the Silver State followed by a return to the Golden State. PNG/NGC is up first in Las Vegas, with their PNG Dealer's Deal scheduled for August 17-19 at the Wynn. The following week, PCGS will host their second members-only show at the Palazzo, August 27-29. Those having participated in the trio of ANA sales will have to keep a close eye on their liquidity and credit lines in order to ensure having enough buying power in Vegas and Long Beach. Given the current shrinking lines of credit, most of the auction houses are extending terms and otherwise being creative, easing the immediate impact of those purchases. When the ANA related gavels fell silent, over 8,000 lots in total were sold by the three participating companies, averaging in at over $5,500 per lot. While some buyers may have stretched to acquire specific wants, those slabs that lacked pizzazz or the wow factor continued to languish as is evidenced in this report.

Obviously several tiers of competition within the certified market have existed for some time. What is becoming more apparent is that average collectors, mostly out of necessity, have cut back on their coin budgets, yet are determined to hold onto their collections. On the other hand, well-heeled, knowledgeable collector/investors still have their game faces on, intent on completing phenomenal certified registry sets. Other aficionados are just waiting for market levels to drift a little bit further, excited at the prospect of socking away a few superb upper echelon rarities. This, in part, is why there were conflicting reports at the summer ANA. Success depended on what dealers had in their showcases, and at what price. Pedigreed classics, dazzling Deep Cameo Gold, and CAC coins sold on their individual merits, while slabs not blessed with a storied past, eye-appeal or green bean, weren't given a second look.

In the Silver Commemoratives market segment, two issues of some import go negative this week. A PCGS MS65 example of the 1928 Hawaiian Sesquicentennial and a PCGS MS67 Antietam suffered at a recent auction, and both items are now Bid lower. Gold Commems share a similar fate. A PCGS MS67 1915 S Pan Pacific Expo $1 sold for $5,925. Prior to this, we had not recorded a sale below $6,000 for this coin, ever. This population 48 coin, with none finer, was worthy of a $9,750 sight-unseen Bid in 2002, and up until a year ago, similarly graded specimens were realizing over $10,000 on average.

The one bright spot amongst the Morgan Dollars is the 1883S in PCGS MS64, which advanced from a sight-unseen Bid of $3,100 to $3,200. Otherwise, there is a fairly large number of declining Bids—the result of weak prices realized at auction *and* lower wholesale sell offers. The casualties include a wide range of mintmarks, grades and price levels, and a couple of DMPLs too. On the Peace Dollar front, the most positive spin is that the declining Bids are for issues in grades where the coins are valued under $1,000.

Mint State and Proof Type follow the general trends as a handful of items on both charts lose some ground. Perhaps the strongest indication of the shape of the present market for sight-unseen material comes by way of this week's Supplemental Page E, specifically Early Gold Type. A 1795 Ten Dollar Draped Bust, Small Eagle graded NGC MS64 realized $276,000 at retail auction. This market segment also shows significant strength for items valued between $4,500 and $12,500. One prominent dealer has stepped up and is willing to purchase a number of Early Fives and Tens graded PCGS AU58-MS60 for significantly higher levels. Leading the leader list is the Five Dollar 1807-1812 Capped Bust Type, which advanced from $6,150 to $7,000 for an MS60 example.

Washington Quarters from the least to the most valuable of coins continue to display weakness. Buffalo Nickels, Mercury Dimes and Walkers are nearly identical in behavior this week. Within each series there is a number of declines for issues ranging in value from less than $100 to a few thousand dollars, in a wide range of grades. Without question, the most positive segment of the sight-unseen market is Mint State Gold. Not only are there plus signs, but there is a good deal of trading activity taking place as well.

Pre-Long Beach sales include an eclectic five-sale event by the Goldberg's, scheduled for September 6-8. Starting off with the Dan Holmes collection of Early Large Cents on Sunday, followed by Part III of the Ted Naftzger Large Cent collection, which includes the Late Date portion, on the 7th. Topping off that session is the Tom Kelly collection of California Fractional Gold, as well as a superb Hawaiian amassment, the latter cataloged and presented in a joint venture with Stack's. A surprising fifty 1928 Hawaiian Commemorative Halves, the majority of which are graded MS63-MS65, should also bring considerable interest, as we cant think of a single recent sale that included this many of that key issue. Lastly, on September 8, a pre-Long Beach auction will feature US coins and currency as well as the Wexler collection.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services (determined through careful study of market activity) [illegible] the highest nationally reported sight unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of unsupported [illegible] Bid [illegible] Ask [illegible] Trades which are near or below current Bid. CCDn uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers and may fluctuate according to needs. CCDn does not represent that it is possible to purchase selected coins at Bid levels. www.cdnp[illegible]

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN albeit, on a sight basis.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

PROOFLIKE MORGAN DOLLARS

P/L Dollars may be semi-reflective, with less reflectivity than the deep-mirror Prooflike. Bids for P/L's are usually much lower than for DMPL's, but command some premium over non-P/L strikes.

Fresh Material Excites Bidders
Dollars Deliver Plentiful Advances

Nearly $45 million was hammered home in ANA related auctions as well as many more millions in business transacted on that bourse. Despite the gloomy shadow cast by some in attendance, the market and the hobby are still very active as the dog days of summer are upon us. Volume buyers that we have spoken with do have to make adjustments, though, as established credit lines are either shrinking or being snipped away due to overall economic fears. Liquidity has always been extremely important; it's now mandatory. While coins that are not all there for the grade become perceived bargains for some new hobbyists, fresh certified coins with pizzazz, pedigree and unquestioned rarity, are being hunted vigorously, with higher bounties being paid for their capture.

Early September may be just what the doctor ordered as a series of Pre-Long Beach auctions held in Beverly Hills by the Goldberg's should bring out the competitive passion that is synonymous with true numismatists. Both early and late date Large Cent aficionados will have a field day vying for top tier specimens and rarities that truly befit that description as powerhouse collections by Holmes and Naftzger ignite the proceedings beginning September 6. Popular and rare Hawaiian coins, patterns and currency should also bring some historic prices. The evening session tops off with the exciting Kelly Collection, boasting a complete set of California Fractional Gold. The Pre-Long Beach sale on the 8th featuring many coins from the Wexler collection, is the stuff that spawns a feeding frenzy. Scores of Mr. Wexler's coins had been bought in the 1940's through the 1960's, stored in a vault for over 50 years, until recently graded by PCGS/NGC. For those collectors wanting to get a jump on all this west coast action, Stack's is offering an Express sale on 8/26. This novel event features live floor Bidding at their NY gallery as well as internet action. Included are 75 lots approved by CAC, many carrying no reserve. A few of the CAC highlights are included herein.

Silver Commemoratives are mostly stable at current levels. A couple of jiggles involve the 1920 Maine Centennial advancing from $235 to $250 in PCGS MS65 and the Arkansas Centennial Type advancing by $5 to $75, in PCGS MS63. Meanwhile, the Oregon Trail Memorial Type loses a little bit of ground for grades MS61 through MS63. Classic Gold Commems account no losers this week, and the 1915S Pan-Pac Expo $1 moves up in MS65 and MS66 for examples encased by PCGS.

Morgan and Peace Dollars are extremely active with advancing Bids touching a large number of issues. The single largest jump is for examples of the 1903 Philly Morgan in NGC MS65, which leaps to $170 from $135, a 26% increase. Next is the 1897 Philly issue in NGC MS65, which is up by 12%. The high Bidder here, a market-maker in Dollars, both generic and better, will take quantities of these issues. This dealer often places "continuous" sight-unseen Bids on the electronic trading networks, meaning once the Bid is hit, it instantly reappears at the same level. As is the norm with most wholesale dealers, transactions of this nature occur over the phone, and not through the networks. There is one major casualty to report on the Morgan chart, and that is the 1903O in NGC MS65 DPL, a pop 4 coin with 1 higher. An example realized $2,530 at retail auction, resulting in this decline. Peace Dollars are equally active by way of higher Bids which, along with the Morgan increases, bodes well for long-term health of the market.

Mint State and Proof Type—across all the different metals: Copper, Nickel, Silver and Gold—are quiet apart from the slightest adjustments in Mint State Gold. The nearly 10 percent increase for Type II $20 Libs in MS61 is the boldest jump and also a most welcome move. A veritable plethora of plus and minus signs grace this week's Supplemental Page F. Of genuine importance are the significantly higher Bids for non Full Head key dates among the Standing Liberty Quarters. Franklin Halves, quite frankly, are a catastrophe zone with a number of the key dates spiraling downward in 65 FBL and 66 FBL, mostly in PCGS plastic, but NGC is not entirely recused. While Saints are mixed with select issues advancing in PCGS MS65, the real indication here is skittishness and a downward bias. For example, a 1925D in PCGS MS65 realized $69,000 on 8/2/09. This same coin—not a similarly graded example, but the same coin, same holder— brought $92,000 a year earlier.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services, determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices). The **CCDn** may not respond to the removal of a high Bid but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers, are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Competition For Acquisition Heating Up Bidding Muscle Returning To Trading Networks

It used to be that numismatists, at least those dealing professionally, took a breather during the summer months. It's now a never ending series of auctions and shows with virtually no down time for dealer or collector. In fact, several dealers wrapping up the PCGS Members Only event in Las Vegas concluding August 29, have indicated that they are staying out west, wanting to get a jump on the mass exodus of other dealers and collectors embarking in force again to the Golden State. What's the big draw? The pre-Long Beach auctions, held by the Goldbergs in Beverly Hills September 6-8, specifically those showcasing the fabulous Large Cent collections. Many new hobbyists and those advanced collector/investors that have been lectured and trained to buy and hold the best quality they can afford, (most assuming that means Mint State) may have a hard time with this — not all rarities are MS65 monsters. Take the upcoming Holmes collection of Large Cents, many of the coins are absolute rarities devoid of Mint fresh details, yet they are rich with historic significance and bound to spawn a Bidding frenzy of major proportions. Some collectors would much rather place a barely distinguishable version of the heralded Strawberry Leaf Cent in their cabinet than a conditionally rare DMPL Morgan Dollar and will flail Bidding paddles to insure the same.

A number of issues within the Silver Commemorative series have advanced nicely. Sight-Unseen Bid has increased for PCGS MS67 examples of the Stone Mountain Memorial to $600 from $520, which translates to a 15% increase. Hawaiian Sesquicentennials have climbed to $4,000 for any NGC MS65 example, about one week before the Goldberg's sale of some 50 pieces in assorted condition. The cadre of Silver Commemoratives that sport minus signs can be compared side-by-side with the lowest auction prices realized in the Market column that precipitated the decreases to Bid. In the case of the 1922 Grant Memorial with Star in PCGS MS66, an offer to sell the coin dealer-to-dealer this week and denoted by a "w" in the Market column is the catalyst for change.

Morgan and Peace Dollars are under some downward pressure as a number of generics and slightly better dates sold at a discount. Common date Peace Dollars that grade NGC MS67 are now Bid $2,300 sight-unseen, which represents a 5% increase from the previous level. A fair number of advances have been recorded for Mint State Type - specifically Silver Type. Leading the way is the Flowing Hair Half Dimes at $5,000 and $5,500 for PCGS MS61 and MS62 examples, respectively. The recent sale of an NGC MS67 Capped Bust Half Dime for $6,000 is reflected in the Market column preceded by a "t" for trade. Proof Type is somewhat of an enigma. A glance at the NGC chart reveals a nice complement of plus signs. What is interesting is that the Market column for PR67 Barber Halves, PR66 Morgans, and PR66 With Motto Seated Dollars portrays results for *retail* sales of coins that are **less than** their current *wholesale* sight-unseen Bids. Mint State Gold Type is the real winner this week, with a huge array of higher sight-unseen Bids. Sight-Unseen Bid for Type III $1 Indians leaped to $775, for any example in an NGC MS63 holder. A substantial number of modest increases are in place for Walkers in grades MS61 thru MS65.

Some dealers feel they are actually being more aggressive in their acquisitions recently. A quick glance at one of the electronic trading networks, seems to corroborate this. In the last 4 weeks, the number of Bids on CCE has increased by roughly 20% and the total dollar value of those Bids amounts to an increase of $25 million. The biggest return to action is for Gold Type. Smaller denominations such as Gold Dollars reported in with only 6 ghostly listings at the end of July. That has now exploded to over 3,300. Buyers have also flocked back for Half Eagles, displaying thousands of more active Bids targeting the Liberty Head series. The always popular $5 Indians are also reporting a surge in listings and dollar value soaring over 225%. $10 Indians have also refueled with a 150% advance in posted Bids. While these figures are not necessarily reflecting a like increase in standing Bid, it does indicate the return of confidence at these levels.

Stack's Express auction of 8/26 is in the books, reeling in nearly $350K and boasting an 80% sell-through rate that included 45 CAC approved lots. One of the top performers was a CAC stickered PCGS MS63 1807 Draped Bust Half, capturing $17,825.

The **Certified Coin Dealer newsletter** (the *Bluesheet*) reports current **wholesale** market Bids for coins certified by the most active grading services determined through careful study of market activity (including the highest nationally reported sight-unseen Bids, Asks, Trades, prior levels, and auction prices) The **CCDn** may not respond to the removal of a high Bid, but will be strongly influenced by the lowering of an unsupported high Bid or by Asks or Trades which are near or below current Bid. **CCDn** uses every means available to insure accuracy and completeness of the **wholesale** levels shown. Individual buy and sell prices will vary among dealers are strictly the responsibility of the dealers, and may fluctuate according to needs. **CCDn** does not represent that it is possible to purchase selected coins at Bid levels. *www.cdnpublications.com*

Certification does not guarantee protection against the normal risks associated with potentially volatile markets. Client or sight-seen sales may command a substantial premium above *Bluesheet* Dealer-to-Dealer Bids.

Some bids within represent very conservative sight-unseen buy prices on the part of the highest visible bidder In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

MARKET LISTINGS

MARKET columns reflect the latest dealer–to–dealer selling prices seen in the market, based on monitoring Low Asks or Last Trades from ***wholesale*** trading networks, sell lists, coin show and other sources of *wholesale* transactions. Auction *prices realized* or *retail* trading information are used to adjust prices for infrequently traded issues. The Publisher warrants that it has exercised due diligence; presently, there is no practicable method of following all *wholesale* postings or transactions. Readers should be aware that there is no implied guaranty or belief that the prices listed are actually representative of the current market value of any coin; listing does not guarantee that such a coin is now available for purchase, or that it was actually available at the time the Market price was posted. Due to the volatile nature of the market, current values may be greater or less than the market price listed. A higher grade coin might display a lower Market level than a lower grade specimen, due to limited sell information. **Listing Policy**: During the thirty days prior to publication, we track the lowest sales–related price in the marketplace. Last Trade information normally takes precedence over Low Asks, except when a lower Ask is posted during the last week before publication. We delete stagnant Market prices which are lower than current Bid. Since the timeliness of the information is important, we use the following timing symbols: "**w**" – Lowest asking price during the week prior to publication (week old); "**m**" – Lowest asking price during the previous three weeks (*m*onth old); "**t**" – *T*rade during the most recent month; "**lm**" – Lowest asking price appearing *l*ast *m*onth; "**lt**" *T*rade appearing *l*ast month; "**ot**" *T*rade older than 2 months; " " a blank, for all Market prices older than two months; "**a**" for auction transactions; "**oa**" – auction older than 1 month.

COMMEMORATIVES

Some bids within represent very conservative sight–unseen buy prices on the part of the highest visible bidder. In these cases, a more accurate reflection of a coin's true value may be found in the CDN, albeit on a sight basis.

Greatest Gold Mine of Coin Data - Yours FREE!

CAC's POP Report puts all the data you need at your fingertips

CAC-stickered coins give you confidence. That's because we verify previously graded coins and award our green sticker only to those that are at minimum "solid" within their grade. Data for each of the stickered-coins is maintained in an elaborate online database, where you can easily verify any CAC coin.

Now, all of the data is compiled in CAC's Population Report – an absolute "must have" if you are active in today's rare coin market. Novices and advanced collectors alike can now access up-to-date, comprehensive data on all CAC-stickered coins, free of charge, by visiting our website at www.caccoin.com.

It's easy to identify coins that are solid for the grade - just look for the CAC verification sticker. And now there's an easy way to access a gold mine of CAC coin data, the FREE CAC POP report.

Long Beach Offering A Warm Welcome Early Type And Gold Hot

Many prominent dealers and avid collectors have already begun to land in waves in the Golden State, ready to make some fresh deals before the Long Beach gala next week. A number of participants, both professional and novice, are also eager to view firsthand the landmark Copper properties pedigreed to Holmes and Naftzger, scheduled to be auctioned off this coming weekend in Beverly Hills by the Goldbergs. This is one series of auctions that collectors wouldn't dare miss as it will surely make history.

While the heat is on for Early American Copper enthusiasts, the metal market is turning the burners up a notch too. Gold and Silver are sizzling. The yellow metal has surged past $995 an ounce, while the white metal has powered well past $16. This certainly bodes well in numismatic circles for an extra exciting Long Beach Expo. Historically, September has been a good month for Gold (although those diehard Long Beach attendees may argue this point) with a gain registered 80% of the time in the last two decades. One significant reason for this pattern is consumption—primarily in the jewelry industry—with the lion's share going to the world's largest consumer, India, for religious festivals and wedding gifts. A closer examination reveals that while Gold has reported in with a solid 14% gain since January of 2009, it's Silver that leads the way, with a 51% gain during the same period. What makes this particular action special? Some pundits feel that this current metal surge may have some legs to it. Gold in particular last visited these levels in early June, and that was but a brief encounter. This time, many analysts feel that the base of support has been building soundly over the last several months, and the four-figure level could be fast upon us.

What does this mean on the numismatic front? Certainly more excitement, courtesy of media coverage, can only serve to the hobby's benefit. The current metal frenzy and Early Copper mania may very well result in yet another expansion of the collector base. This could bring in more closet collectors, as well as ardent enthusiasts, anxious to purchase both generic and better date Gold Type and Silver Dollars. Time and place are always key ingredients, and on the one-year anniversary of a devastating economic collapse, things are shaping up for a very promising run.

Bids for Silver and Gold Commems are predominantly stable at current levels, with the only adjustments accruing to a couple of Gold Commems. 1926 Sesquicentennial Quarter Eagles advance to $2,100 for examples in NGC MS65 holders. 1903 McKinley Dollars slip to $865 for Very Choice coins in PCGS slabs. High-end Morgan and Peace Dollars suffer no losses this week, though a few issues in the $30 to $50 range are under some downward pressure as a number of generics and slightly better dates sold at a discount. A couple of items—namely the 1887S in PCGS MS61 and the 1878S in NGC MS64—saw examples sell for $69 and $58, even though sight-unseen Bids of $92 and $76 were posted on the wires, respectively.

Mint State Type, particularly Liberty Seated Halves and Quarters in MS63 through MS67, are on the rise in NGC holders. Liberty Seated Half Dollars, No Motto, are now Bid at $750, a nearly 20 percent increase over the prior highest sight-unseen Bid; MS65 examples jump 11 percent to $3,000. With Gold barreling its way toward $1,000 per ounce, it is no surprise that Generic Mint State Gold is eagerly sought. On the sight-unseen front, the increases favor NGC over PCGS by a factor of nearly 3 to 1. What is not revealed by the chart this week, but is rather perplexing, is the sale at retail auction on Sunday, August 30th, of a 1907 $10 Lib in an NGC MS64 holder for $1,970. In place at that moment was a sight-unseen Bid of $2,300, which has now increased to $2,340, leaving some $330 on the nightstand.

ANACS and ICG supplemental pages are a must see, especially the Mint State Gold charts, where increases abound. Conversely, Bids from the major supporter for coins in ICG holders are no longer in place, and a few issues have tumbled significantly as a result. This situation may go on for some time if supporting Bids do not return and ICG material continues to see weak auction results.
